Predicts White Whitewash

To the Editors: Don't expect any changes. Within days after the Detroit disaster has simmered down the entire episode will be glossed over. The indignant editorials will disappear, the TV pundits will again direct their barbs against the South while the dissidents will be summoned to Washington and reminded that the Great White Father is still all-powerful.

Upon their return to Detroit or Newark they will issue pious statements praising the "anti-poverty" programs and blaming the pillaging, arson and murderous sniping on "racial prejudice." The coalition of international money lenders and Marxist discipline intent on pro-Soviet machinations will see to it that Congress goes off on fishing expeditions.

Investigations and commissions will predominate with gallons of whitewash liberally applied. CIA money will step in, in fact it is already being used to suppress news of Stokely Carmichael's presence in Castro's Cuba.
